Luke Prebola

Glen Rock, NJ | lprebola@villanova.edu | (201)-956-0550 | www.linkedin.com/in/luke-prebola-2536b9358

Education

Villanova University, Villanova, PA August 2024 – Present
Bachelor of Science in Computer Science & Economics | Expected May 2028 | GPA: 3.57
Relevant Coursework: Statistical Methods, Principles of Database Systems, Macroeconomics, Microeconomics

Projects

Celiac Disease Diagnosis Bias Analysis | Python, Pandas, Tableau | Personal Project

- Built a data pipeline in Python and Pandas to clean and merge celiac disease prevalence, GDP per capita, urbanization rate, and health expenditure per capita data across 44 countries into a unified dataset with zero missing values.
- Ran regression analysis across three economic/health variables, finding statistically significant negative correlations between celiac diagnosis rates and both GDP per capita ($R^2 = 0.122$, $p = 0.020$) and health expenditure per capita ($R^2 = 0.108$, $p = 0.030$).
- Interpreted the negative relationship as evidence of diagnosis bias: wealthier, higher-spending countries likely have greater access to specialist testing, not lower true prevalence. Visualized findings in an interactive Tableau scatter plot with trend line, published to Tableau Public.

Denver Broncos 2024 vs. 2025 Analytics Dashboard | Python, Oracle SQL, JavaScript | Personal Project

- Built an NFL analytics pipeline enabling year-over-year comparison of offensive stats by using Python APIs and Oracle SQL to collect and structure data.
- Created an interactive dashboard to visualize key performance metrics, including receiving yards, touchdowns, and QB stats, across two seasons using JavaScript and Chart.js.

Bloomberg Terminal & Excel Macroeconomic Analysis | Excel, Bloomberg Terminal | Class Project

- Built a 10-year macroeconomic dataset (2016–2026) using Bloomberg Terminal, tracking real/nominal GDP, inflation (CPI/PCE), and consumer confidence trends.
- Identified inflation peaking near 8-9% in 2022 and confirmed countercyclical fiscal policy in 2020, where government spending rose as consumption and real GDP contracted.

Technical Skills

Languages: Python, SQL, R, Java, JavaScript, HTML
Data & Analytics: Tableau, Pandas, NumPy, Excel, Bloomberg Terminal
Tools & Databases: Oracle SQL, REST APIs, Git, GitHub

Leadership & Activities

Orientation Counselor, New Student Orientation | Villanova University April 2025 – Present

- Mentored a group of 23 incoming students, providing guidance on academics, campus resources, and the transition to college life.
- Collaborated with orientation staff and fellow counselors to plan and facilitate programming that supported a successful onboarding experience for new students.

Volunteer Coordinator, Special Olympics | Villanova University September 2024 – Present

- Led a team of student volunteers in planning and executing event-day food distribution for Villanova's Special Olympics competition.
- Coordinated logistics to ensure timely refueling and support for all competing athletes, contributing to a smooth, welcoming event experience.

Work Experience

Chemistry Lab Storeroom Keeper, Villanova University | Villanova, PA February 2026 – Present

- Managed inventory for 15+ chemical and equipment SKUs, distributing supplies to 200+ students weekly while maintaining 100% compliance with lab safety protocols.

Lifeguard / Swim Instructor, Wyckoff Family YMCA | Wyckoff, NJ July 2022 – August 2025

- Maintained a safe environment for 100+ daily patrons through vigilant supervision, adherence to safety protocols, and routine equipment inspections and emergency preparedness drills.
